

## Steingraeber Concert Grand Piano

Dedicated at Grace Lutheran Church in 2001

The piano is unusual in that its treble end is of greater length than other grand pianos, defining the high pitches with a distinction in clarity that other famous makers do not achieve. (It's jokingly said that the "fat lady" who stands in the crook of the piano to sing will have to go on a diet before singing with *this* piano [as there's less space for her to stand in]!)
